

PEPTIDES: THE BUILDING BLOCKS OF ORGANIC LIVES

Peptides are short chains of amino acid monomers linked by peptide bonds. They are essential in every organism, since they are involved in almost every process. They help regulate body functions, reduce inflammation, and enhance antioxidant effects furthermore they play a key role in transportation and communication. Perhaps the easiest way to think of peptides is as messengers. They carry information between the cells. Almost none of the building processes in the skin are able to proceed without them, and their deficiency at the cellular level blocks the regeneration which is vital to the aging skin.

As technology evolves, peptides synthesized from plants have the potential to support the body in cosmetic treatments at the cellular level in its structuring, regenerative processes. Solanie NNR (No Needle Rejuvenation) system is an excellent tool for treating basic skin problems effectively with peptide complexes and several special active ingredients without injuring the skin.

PEPTIDES USED IN THE SUPERCOMPLEXES:

TELANGYN®

Acetyl Tetrapeptide-40: This tetrapeptide reduces redness of face caused by an inflammatory reaction. It has a photoprotective effect that helps reduce cell damage caused by UV radiation and relieves hyperpigmentation caused by inflammation.

RUBIXYL®

Key receptors are controlling the evolution of skin and its aging. Hexapeptide-48 HCl activates and maintains the expression of these receptors to stimulate the expression of skin barrier markers reinforces barrier and recovers hydration in mature skin. And it also reactivates skin cells' differentiation markers reduce the deep wrinkles associated with crow's feet and increases smoothness.

ARGIRELINE®

Acetyl Hexapeptide-8: reduces the depth of wrinkles on the face caused by the contraction of muscles of facial expression, especially in the forehead and around the eyes. ARGIRELINE® is a safer and milder alternative to Botulinum Toxin, topically targeting the same wrinkle-formation mechanism in a very different way.

LEUPHASYL®

Pentapeptide-18 that mimics the natural path of enkephalins, acting on expression wrinkles formation in a new way. This alternative mechanism offers compatibility with other anti-wrinkle peptides, providing an additive and synergistic effect. Leuphasyl® peptide reduces the depth of wrinkles caused by the contraction of muscle of facial expression, decreasing neuron excitability and modulating acetylcholine secretion.

MATRYXIL 3000®

Palmitoyl Tripeptide-1, Palmitoyl Tetrapeptide-7: support the activation of the cutaneous repair process, and in particular at the level of the fragile and UV-damage prone papillary dermis. Matrxyl®3000 promotes wrinkle smoothing and improves tone and elasticity.

NEODERMYL®

Neodermyl® increases the synthesis of Pro-collagen I in a dose dependent way. Aged fibroblasts show even better ratio of production compared to young fibroblasts. Neodermyl® increases the quantity of total collagen in 2 weeks. It is anti-wrinkle, youth collagen booster, firms, re-densifies and energizes.

PEPTIDES

SO11200 • Solanie Quick Fine Enzyme Peeling Gel 30 ml

0% | Paraben

By using Quick Fine Enzyme Peeling Gel discover the silky, smooth skin which is prepared for further treatment! The special exfoliating gel splits the protein bonds between skin cells, thereby effectively removes dead skin cells and cleanses the face at the same time. Regular application can not only help to achieve perfectly smooth and healthy skin but also maximize the absorption of other skin care products thus improving their effects. Use it once a week to help the absorption of our elixirs.

SO11202 • Solanie Ultra Matt 3 Peptides Elixir 15ml

Perfect Relax elixir with its peptides provides a Botox-like skin rejuvenating and wrinkle smoothing effect on the forehead, eye and mouth around areas. The treatment relies on Neodermly®, Argireline® and Leuphasyl® peptide complexes. The elixir reduces the depths of wrinkles caused by the contraction of mimic wrinkles. Added hyaluronic acid and herbal extracts not only supply the skin with valuable moisture, but also create a natural medium to regain its elasticity.

SUPERCOMPLEXES IN THE DEPTH OF NEEDLESTICK WITHOUT ANY STICK!

All of our mesotherapy elixirs with no needles are based on a unique 3-peptide supercomplex. Each elixir targets one skin problem, and besides they have smoothing and skin tightening effect as well.

SO11204 • Solanie Extreme Hyaluron
3 Peptides elixir 15ml

You can extremely improve the hydration of your skin with our Extreme Hyaluron elixir and its peptides. Hyaluronic acid with low, medium and high molecular weight can be delivered deeply into the skin by Neodermly®, Rubixyl®, Leuphasyl® peptide complex's needle-free mesotherapeutic effect. It achieves spectacular results of smoothing and firming just like collagen injection therapy. The immediate and drastic hydration of different skin layers is completed with the „beauty receptor” activating effect of Rubixyl® peptide. This improves the skin own protecting mechanism and refreshes the tired skin caused by oxidative stress.

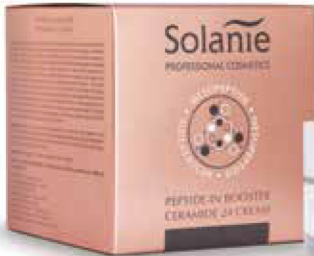

SO11201 • Solanie Max Lift
3 Peptides Elixir 15ml

0% Mineral Oil
Paraben
Silicon Oil
Fragrance

Max Lift elixir with its peptides is one of our best skin tightening products that smooths out even the deep wrinkles and regular application can provide a more elastic and dense skin structure. The special 3 peptides complex is combined with low molecular weight hyaluronic acid. Therefore it gets absorbed easily and deeply into the skin, where it moisturizes the skin from below by bonding with water molecules. The valuable argan plant stem cell extract improves cell regenerating thereby tightens the skin.

SO11207 • Solanie Peptide-In Booster
Ceramid 24 Cream 50ml

Improve the efficiency of 3 Peptides elixirs used during your skincare routine with this Peptide-In cream. This activating cream is ideal for normal and dehydrated, moderately fat-deficient skin types. It activates the applied elixirs on the face, therefore, maximizes the effect of active substances. Lipids of epidermal origin help the absorption of valuable compounds. Moreover, by rebuilding the hydro-lipid layer on the surface it protects the skin from unwanted loss of moisture.
